CT Excitation Sub

Further, Faster

As the industry continues to push the limits on extended reach drilling, the need for enhanced extended reach technology is also required. The CT Excitation sub is able to be paired with Kenjer's proprietary extended reach tool, the Krawler, in challenging applications which require additional friction reduction near the bit.

Key Features

- At 30.9" when fully extended, the length is amongst the shortest in the market
- Ability to provide enhanced friction reduction near the bit in challenging applications
- High tensile and torsional strength

Technical Specifications*									
Tool Size	Tool I.D. (in.)	Connection	Closed Length (in.)	Extended Length (in.)	Tensile Yield (lbf)	Torsional Yield (lb-ft)	Tool Weight (lbs)	Pump Open Area (in ²)	Max Operating Temp (deg. F)
3-1/8"	1.19	2-3/8" Reg.	27.3	30.9	166,000	5,000	45	2.0	400
2-7/8"	*Currently in Development*								

* These are theoretical values calculated that do not consider combined loading. An appropriate factor of safety should be used depending on conditions expected in the field. These values are true and accurate at the time of print date shown below. Information is subject to change without prior notice.
